

ICSIC Programs

Second Step

Second Step is a behavior management and violence prevention program. It integrates academics with social and emotional learning. Children from preschool through Grade 8 learn and practice vital social skills, such as empathy, emotion management, problem solving, and cooperation. These essential life skills help students in the classroom, on the playground, and at home.

Primary Project

Primary Project is a school-based prevention program proven to promote school adjustment. It will be offered for students in K-1 in the first year and expanded to K-3 subsequent years. It addresses social, emotional, and behavioral problems experienced by many children in their early years at school. Paraprofessional staff, supervised by mental health professionals from DMH, work one-on-one to help children strengthen their coping and peer sociability skills and to adjust to school.
